AUDIENCE

The UPT skill development method is directed toward the intermediate and advanced musician who demonstrates individual proficiency in several playing techniques and desires a comprehensive and integrated approach to performance.

The beginning guitarist will also benefit by using the Crossover Pick to comfortably acquire the individual picking hand skills presented in the method.

“Finally, a device has been invented to facilitate the fusion of plectrum & finger style technique without compromise.

In the past, plectrum players had limited access by holding a pick and using one, two or three fingers. Finger style players did not have the dynamic range achieved by using the flat pick. At the same time, the traditional thumb pick did not bridge these two camps effectively.

The wait is over with the invention of the SharkTooth & Kodiak Crossover picks from Strum-N-Comfort Picking Systems. The fusion of pick and finger style is achieved without compromise. The revolutionary Crossover Pick gear allows the dynamic expression of each style effortlessly, thus creating a technique of unlimited possibilities referred to as Universal Picking Technique” Says, Virtuoso guitarist Peter Page.

Universal Picking Technique is developed using a combination of the patented Crossover Pick gear, instruction methodology and a growing series of musical arrangements that facilitate the development of advanced guitar playing skills.
